Overview Process procedure (not USA, Canada, Mexico) for sales

SourceWeb Medical AG is a subsidiary of SourceWeb International AG.

We are active for you in logistics, import/export as well as in the IT industry. This adaptation of fields of activity in connection with our long-standing contacts with manufacturers and suppliers is at your disposal. Currently especially in order to be able to offer you protective equipment as well as other products at fair prices with the highest quality.

The internationally certified team of experts at SourceWeb advises you from the first step to the receipt of the goods and accompanies the handling of the sometimes complex processes.

Indicative overview of the purchase of 3M products:

- 1:** The contact person to SourceWeb must submit the 3M application form in full. It shall list the basic data of the buyer (Light-KYC) and all persons entitled to commission.
- 2:** SourceWeb checks the feasibility and coordinates this with the contact person if adjustments/requests are required.
- 3:** The contact person may clarify the adjustments/queries with the buyer side.
- 4:** Invitation for a pre-call will send:
Participants: SourceWeb & Buyer, Buyer's Lawyer.
First get to know the buyer and the SourceWeb, clarify and explain the necessary processes and their process, pre-due diligence.
- 5:** Full KYC of buyer & NCNDA between buyer and SourceWeb.
- 6:** Buyer submitted
 - current LOI according to template SourceWeb (www.loi-draft.sourceweb-medical.ag).
 - complete data of the customer attorney to SourceWeb.
- 7:** Facts and customer data are presented to the trust attorney (assignment of special conditions, Due Diligence Escrow), in parallel the client receives the data of the trust attorney.

- 8:** Customer and/or the customer's lawyer makes independent contact with the Fiduciary lawyer on:
 - Meeting & signing of the Escrow contract
 - Filling of the Escrow according to LOI
- 9:** SourceWeb determines the final inventory and price according to LOI and secures or reserves it for the customer according to its specification.
- 10:** Purchase agreement (SPA) is created, discussed and drawn. All necessary documents and documents (SGS, POL, etc.) are exchanged between SourceWeb and the buyer exchanged.
- 11:** The delivery is coordinated and processed in accordance with the contract. The buyer will be informed of each step in writing.
- 12:** Contractual delivery of the goods. Handing over the goods to the buyer. Further SGS analysis may be optional upon arrival of the goods.
- 13:** Release of escrow/payment.

The goal has been achieved and we look forward to further successful settlements with you.

Important notes:

ESCROW:

Processing via an Escrow provides maximum security for the customer (buyer protection); especially if the customer actively handles the contract and maintains direct contact with the managing lawyer, as here.

With the necessary funds on the Escrow, all prerequisites are met to secure and reserve the goods. This offers maximum flexibility in the choice of the market, especially in terms of prices and delivery times. At the same time, there is no risk of losing the preferred stick again (timeout in a later setup and replenishment of the Escrow account and the due diligence required for this). In addition, there is maximum discretion, as sensitive data such as the origin of funds, financial statements, etc. are only discussed and exchanged with the managing lawyer.

Other benefits:

- Maximum flexibility.
- Protection against attachment (funds are held by the Bank as special funds).
- No negative interest rate.
- Optimum price/performance ratio through the terms negotiated by SourceWeb (the customer will continue to be available regardless of a business relationship with SourceWeb).
- The costs are covered by The SourceWeb after successful completion.

The escrow accounts in Germany are safer and more comfortable to open compared to other countries, but also faster. German escrow accounts have a higher level of acceptance and are therefore preferred. This payment method has proven to be a secure system in international trade over the years.

Of course, for the escrow account opening our expert team is available at any time.

Documents:

The documents to be signed must be printed, with blue pen signed, stamped and scanned (at least 200 dpi). Then documents will be sent via the authorized email address of the subscriber directly to the legal department of SourceWeb.

Yours sincerely,

Ihr SourceWeb Medical Team
